

# The POS 750 is a Mix of Contemporary Design and Great Functionality

Stay ahead of the competition with this fan-less touch system all-in-one, POS 750. Enclosed in a heat dissipating solid aluminum die-cast casing, the POS 750 offers innovation and precision at it's finest.

The POS 750 Features an Intel Dual Core Atom 1.8Ghz processor, with up to 4GB of memory and a 160GB HD.

The POS 750 has undergone stringent industrial testing to ensure qualifications received for 'Ingress Protection'. Awarded IP66 certification, the POS 750 ensures total protection against dust and strong jets of liquids from all directions.

Furthermore, the 30 degrees angle tilt of the card reader provides user comfort and convenience. Designed with the natural movement of the human body in mind, the POS 750 is an ergonomic Touch Screen system.

# POS 750: Dual Displays

The Dual POS 750 offers all the features of a Point of Sale terminal and much more. It engages the customer at the point of purchase through promotions, advertising and motion videos from the second display.

Dual POS 750 is not only versatile, but it also provides maximum eye-catching exposures to your customers.

The second screen can aid sales through attention grabbing interactive displays and influence the customers purchasing decision right at the point of purchase whilst at the same time offering live newsfeeds and weather forecast.

Achieve more with the DUAL POS 750.

Various mounting ability for versatility and convenience

Providing **Superior** User Safety and Peace of Mind.

The Dual POS 750 provides enhanced security features such as concealed mounting hardware and internal cable management, along side an elegant design, giving your point-of-sale hardware a professional and state of the art finish.

## Dual Screens, Dual Functionality, Dual Benefits
